COBI.wms Solution Overview

# Mobile Warehouse Management for SAP Business One

COBI.wms is the modern solution for a simple and mobile warehouse management. Accurate and streamlined inventory management is crucial to your ability to deliver on promise, as well as to maintain customer satisfaction and inventory cost control.

As a reliable add-on, COBI.wms offers you the possibility to book all activities from the warehouse directly into SAP Business One. Multiple warehouses with and without bin locations can be handled as well. Thanks to simple implementation and future-oriented mobile technology, you can boost the productivity and efficiency of your business.

- Increase productivity as a result of time saved and simplified mobile transactions
- Avoid duplicate work and eliminate paperwork by booking directly from the warehouse into SAP Business One
- Easily and intuitively use any android device of choice

# Make it Simple with **Full Integration**

In today's fast paced and ever changing business world, the warehouse needs to connect into many other departments of the business to provide critical information in real time so that you can extract insights to meet customer demand and expectations.

COBI.wms contains fully integrated functions for modern warehouse logistics in SAP Business One. It also has a multilingual user interface and can be used internationally.

# Whatever your Device of Choice is, **we've got you Covered**

The app is compatible both with Android-based as well as Bluetooth barcode scanners and standard Android smartphones and tablets. It comes with various standard modules that are equipped with innovative features.

## Supported Android scanners and devices:

- Honeywell
- Zebra
- Panasonic
- DataLogic
- Android Smartphones Version 8.1 and higher

# Take Advantage of **Extensive Mobile Functionality**

## Productivity

Proactively meet your warehouse management demands and reduce errors and training costs.

Improve your inventory and supply chain management by running COBI.wms flexible, mobile and fully integrated.

## Real-Time Data

Achieve real-time synchronization of goods receipts and warehouse inventory.

Generate reports in SAP Business One with real-time data or monitor your stock and items on the go with the mobile COBI.wms app.

## Mobility

Offer your employees the opportunity to use business processes anywhere and anytime with the mobile device of their choice and automatically reduce downtime in your company.

# Designed for all Small and Midsize **Warehouse Management Needs**
